**Building & Safety Division**

**CERTIFICATION & VERIFICATION FORM**  
**ICE BARRIER INSTALLATION**

I, \_\_\_\_\_, owner of the dwelling located at \_\_\_\_\_,  
(Print Property Owner's Name) (Print Property Address)

Verify that the Ice barrier required by the California Residential Code (CRC) has been installed on the roof surface to a point at least 24 inches inside the exterior wall line of the building and is in compliance with the CRC and with the manufacturer's instructions. **Section R905.2.7.1 of the 2013 California Residential Code** states "In areas where there has been a history of ice forming along the eaves causing a backup of water as designated in Table R301.2(1), an ice barrier that consists of at least two layers of underlayment cemented together or of a self-adhering polymer modified bitumen sheet, shall be used in lieu of normal underlayment and extend from the lowest edges of all roof surfaces to a point at least 24 inches inside the exterior wall line of the building."

**Exception:** Detached accessory structures that contain no conditioned floor area.

*I have read and understand the above requirements and affirm by my signature, that the ice barrier has been properly installed, and is in compliance with the 2013 California Residential Code Section R905.2.7.1.*
